The map displays the Savannah region of Ghana, bordered by Burkina Faso to the north and Côte d'Ivoire to the west. It highlights the Sawla-Tuna-Kalba (STK) district and the Bole district. Key locations marked include Kalba, Tuna, Janavori, Gbiniyiri, Dagbigu, Sawla (police station), Sawla Town, Sanyeri, Denee, Vankoro, Chanchere, Jentige, Bole, Horiyiri, Jaja, Bole Town, and Bole. Orange arrows indicate movement directions from the STK district towards the west and south. An inset map shows the location of the Savannah region within Ghana. A legend identifies regions, districts, affected communities, host communities, district capitals, and hosting IDPs. A scale bar shows 0, 7, 14, and 28 km. A disclaimer states: "Disclaimer: This map is for illustration purposes only. The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the International Organization for Migration."

Figure 1.\* Onward Movement Intention of Affected Population

A donut chart illustrating the priority needs from assessed locations. The chart is divided into two segments: a dark blue segment representing 'Go to another location' at 75%, and a light blue segment representing 'Stay in the same location' at 25%.

| Need                      | Percentage |
|---------------------------|------------|
| Go to another location    | 75%        |
| Stay in the same location | 25%        |

\*Multi select answers allowed

Figure 2.\* Priority Needs from assessed locations

An infographic showing the percentage of respondents reporting various priority needs. The needs and their percentages are: Health (75%), Food (63%), Security (38%), and WASH (12%).

| Need     | Percentage |
|----------|------------|
| Health   | 75%        |
| Food     | 63%        |
| Security | 38%        |
| WASH     | 12%        |

### Event Overview

On Sunday, 24 August 2025, violent attacks broke out in Gbiniyiri community of the Sawla-Tuna-Kalba (STK) district, in the Savannah Region resulting in the death of three individuals. The incident stems from longstanding tensions between the Gonja and Brifo ethnic groups in the area. This escalated and spilled over from Gbiniyiri to several communities in the STK and Bole districts.

Government sources reported that the conflict has led to widespread displacement and casualties in over 48 communities with approximately 48,000 affected persons in the STK and Bole districts. An estimated 15,500 displaced persons, including over 13,000 individuals have crossed into several communities in Côte d'Ivoire with majority (5,000 individuals) in Vankoro.

Following reports of these events, the Interagency Working Group on Emergencies (IAWGE), was deployed to conduct a joint multisectoral rapid assessment in the affected communities. The team conducted the assessment in eight communities using the DTM flash report in the STK district. DTM could not be administered in Bole district as the residents of the affected communities had fled. Despite the fact that residents had deserted the communities, the team visited Vankoro (Côte D'Ivoire) to verify the situation and the presence of internally displaced persons (IDPs).

Between the 04 September and 06 September 2025, an estimated 5,733 affected individuals across 1,300 households, including an estimated 3,693 IDPs across 717 households and 2,040 affected host community individuals across 583 households were identified through this joint assessment. Some IDPs relocated to Sawla police station IDP camp, while others fled across the Chanchere border to Vankoro and other communities in Côte D'Ivoire. The affected population included 620 infants, 1,757 children, 2,281 adults and 1,075 elderly. In addition, 48 injuries, 43 missing persons and 28 fatalities were reported.

Healthcare, food, and security were the most immediate and urgent needs identified from the eight communities. While in Vankoro urgent needs observed included Shelter, food, WASH, protection and healthcare.

Figure 4. Age Breakdown of Affected Population

A bar chart showing the age breakdown of the affected population. The chart lists four age groups with their respective counts: Infants (<1y) (620), Children (1-17y) (1,757), Adult (18-59y) (2,281), and Elderly (60+y) (1,075).

| Age Group        | Count |
|------------------|-------|
| Infants (<1y)    | 620   |
| Children (1-17y) | 1,757 |
| Adult (18-59y)   | 2,281 |
| Elderly (60+y)   | 1,075 |

Figure 5. Vulnerabilities of affected Population

An infographic showing the vulnerabilities of the affected population. The vulnerabilities and their counts are: Serious Medical Condition (39), Breastfeeding mothers (236), Pregnant Women (43), Unaccompanied Children (41), Single female headed household (248), and Orphaned minors (17).

| Vulnerability                  | Count |
|--------------------------------|-------|
| Serious Medical Condition      | 39    |
| Breastfeeding mothers          | 236   |
| Pregnant Women                 | 43    |
| Unaccompanied Children         | 41    |
| Single female headed household | 248   |
| Orphaned minors                | 17    |

**Methodology:** Crises and emergencies require the humanitarian community to act urgently. IAWGE and DTM Ghana activate a rapid assessment, a subcomponent of DTM’s mobility tracking, after an incident to document events such as attacks or disasters. The assessment relies on direct observations and a broad network of key informants to gather information on the number, profile, and immediate needs of affected populations. DTM Ghana issues an Early Warning Flash/Incident Report to inform partners and stakeholders for response and planning.

**Disclaimer:** The opinions expressed in the report do not necessarily reflect the views of the International Organization for Migration (IOM) or the IAWGE. The designations employed and the presentation of material in this report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or its authorities, or concerning its frontiers or boundaries.
